Guitar playing

💼 Employment History

Full stack developer at BEAR WITH ME

April 2019 —October 2019

In BearWM company i worked on some Mobile Apps using React Native.
The main part of time while I worked on BearWM, I created logistics platform.
App on wich I worked nearly alone, can be found by following link fastcompany.xyz.
In that project I writes main page, backend and dashboard.

Used technologies:

- Typescript
- ReactJs
- NestJs & TypeORM
- ReactNative
- Redux
- KoaJs
- Jquery
- Bootstrap 4
- SASS
- Git
- Lefleat Maps
- PostgreSQL and PostGis
- Apisausce (Axios)

Frontend Web Developer at BREAK. Media Solutions GmbH

October 2019 — July 2020

In BREAK i learned and worked with VueJs, Vuetify with Typescript and had a little experience in devops for with i used Docker and Kubernates.
Project that I created and on witch I worked fully can be watched on the following link
editor.break-prime.cc.

Used technologies:

- VueJs 2 (With Typescript)
- Vuetify
- Vuex
- Packaging vue app
- Docker
- Kubernates
- Helm (Healper for k8s)
- Firebase Storage

Frontend Web Developer at MoldStud

June 2020 — August 2020

Working with MoldStud I had experience in outstaffing and had opportunity to work with NextJs, Redux-Saga and used React.Hooks using Typescript.
The project was for testing and so now the project is closed.

Used technologies:
- Typescript
- ReactJs
- NextJs
- Redux-Saga
- Axios

🎓 Education

Center of Excelence in Informatic and Informatical Tehnology from Chisinau

September 2017 — January 2020

College was place where I learned basics of programming. The most important that I get from college courses were syntax and basics of C/C++ with OOP.

Others languages and frameworks that I learned wear SQL, C# and PHP with Laravel witch I studied independently because it does not enter in college course.

Python and algorithms

August 2018 — November 2018

Python Python was mine firs programming language that i started to learn independently.
Another reason to learn python was learning algorithms and big volume of free courses.
I learned python from next course judge.mipt.ru and youtube videos.

Javascript and ReactJs

November 2018 — April 2019

After Python I started to learn HTML, CSS, JavaScript from Youtube and then form courses like FreeCodeCamp (my profile freecodecamp/dumitru_pascal), then move to Jquery, Bootstrap 4 and ReactJs, also i learned React with Redux in dipper from coursehunter.net. Tried to create some projects with using of ReactJs Redux and React-Router

📊 Personal statement:

Self-propelled guita

2016

Taekwondo in sportive club "Voievod"

2010 — 2014

Frisbee

2015 — 2017

Frisbee Swimming

2018
